Model 94U Urology Chair Platinum Range

Urology Chair for Prostate Biopsy and Flexible Cystoscopy

Engineered for precision, comfort, and efficiency, this advanced single-column urology chair is designed to support a full range of urological procedures including prostate biopsies and flexible cystoscopies. The innovative single-column base provides exceptional stability while minimising floor space requirements — ideal for compact procedure rooms. Its full-length tabletop allows for patient positioning flexibility and smooth transition from examination to recovery.

Integrated DIN accessory rails enable quick and secure attachment of leg supports or stirrups, giving clinicians the freedom to configure the chair for each procedure. Fold-back upholstered armrests enhance patient comfort and improve access for the clinician.

With fully electric operation, the chair offers effortless adjustment of height, backrest, and foot section angles, as well as precise pelvic tilt control for optimal positioning during examinations and interventions. Combining ergonomic design with advanced functionality, this urology chair delivers superior performance, patient comfort, and operational efficiency — the perfect solution for modern urology clinics and day-case settings.

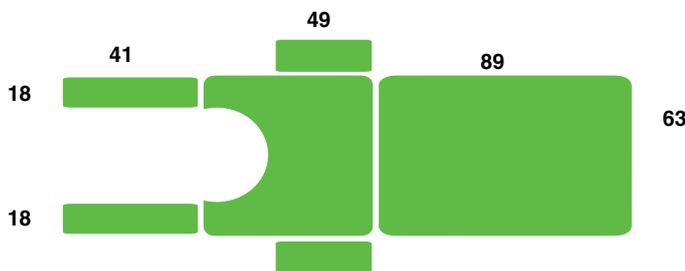

Model 94G Colour - Rosemary

Standard Features
